

Adopt a REEFbud

A personalized REEFbud with your name embedded in it will be a permanent feature in the Marine Environment it is deployed in.

Through time, it will continue to grow and develop like a natural coral reef. This will be your long lasting legacy to the environment.

The Reefbud will serve as an “oasis” under the sea and will turn into a fertile substrate for natural recruitment of corals.

Aside from corals, the REEFbud will also attract all other forms of Marine Life and become a home for algae, sponges, crustaceans, various types of fish, sea anemones, sea urchins etc., Thus, establishing a dynamic Marine Ecosystem.

Adopting a REEFbud can be accomplished anytime and wherever you are in the world, as long as you have an internet connection and access to a Paypal or BPI Account
